

## 2 1/2-Inch Exhaust Rain Cap Flapper Specification

The 2 1/2-Inch Exhaust Rain Cap Flapper is a protective accessory designed to safeguard exhaust systems from environmental factors such as rain, dirt, and debris. It is commonly used on vertical exhaust pipes in heavy machinery, trucks, agricultural equipment, and generators.

### Features:

**Durable Construction:** Built from robust materials like stainless steel or galvanized steel for superior corrosion resistance and long-lasting performance.

**Size Compatibility:** Specifically designed to fit exhaust pipes with a 2 1/2-inch diameter.

**Automatic Flap Mechanism:** Opens when exhaust gases are emitted and closes automatically when the engine is off, effectively preventing water or debris from entering the system.

**Easy Installation:** Includes a clamp or bolt system for secure and hassle-free mounting.

**Weather Resistance:** Offers reliable protection against rainwater and harsh outdoor conditions.

### Applications:

**Heavy Machinery:** Ideal for bulldozers, excavators, and other construction equipment.

**Agricultural Equipment:** Suitable for tractors, harvesters, and sprayers.

**Trucks and Trailers:** Designed for vehicles with vertical exhaust stacks.

**Generators and Industrial Engines:** Protects stationary equipment from environmental damage.

### Benefits:

Extends the life of the exhaust system.

Prevents performance issues caused by water or debris infiltration.

Reduces maintenance costs by shielding the exhaust system from corrosion.
